

Dealing with the Drought

Village Laguna's Letter to the City Council, August 4, 2015:

*Because of the worsening drought, and for as long as drought conditions continue, The Board of Directors of Village Laguna supports prohibiting the construction of all pools and spas in Laguna Beach. We also support enforcing mandatory pool and spa covers for existing pools and spas. However we do urge you to adopt a provision that in the case of new development, owners or developers be allowed to install retaining walls and needed infrastructure, **not including excavation**, to facilitate finalizing pool construction once the drought is over and the moratorium is lifted.*

Sincerely, Johanna Felder, President, Village Laguna
